Art Unit: 1794

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1, 4-7 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 is indefinite since it recites “a deep-frozen” product without claiming a positive method step of deep freezing. Claim 1 is also indefinite since it is not clear what is intended by “in shape” (penultimate line). Claims 4-7 are misdescriptive in reciting “characterized in that”, which should be changed to “wherein”. There is no antecedent basis in claim 1 for: “the preparation obtained” (claim 1, line10); “part-baking” (claim 1, line 11); “deep freezing the assembly” (claim 4); and “the deep frozen state” (claim 5). There is no antecedent basis in claim 5 for: “the part-baked...base” (claims 6 and 7) and “the assembly” (claim 7). There is no antecedent basis in claim 3 for “deep freezing the assembly” (claim 12). Corrections are required without new matter.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3, 4 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fournet et al. Fournet et al is described in paragraph no. 2, Paper No. 20080117. It would have been obvious that stamp 1 with openings 2 in Fournet et al is substantially

Art Unit: 1794

equivalent to applicant's claimed perforated counter-mold since the openings 2 are perforations and since the stamp 1 is used during a flattening operation.

5. Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fournet et al as applied to the claims above, and further in view of Alden et al as set forth in paragraph no. 4, Paper No. 20080117.

6. Applicant's arguments with respect to all pending claims have been considered but are moot in view of the new ground(s) of rejection.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
